#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to RCE***

This Office Action is in response to applicant's RCE filed on March 13, 2006. The amendment filed on February 3, 2006 rendering claims 1-3, 16, and 17 pending and claim 1 has been amended.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 16, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Donovan et al (U.S. Patent No. 5,833,651) in view of Rowan et al (U.S. Patent No. 6,872,225). Donovan et al discloses a local drug delivery apparatus comprising elements as recited in these claims but does not teach a polymeric matrix comprising a rapamycin. Rowan et al discloses a medical device comprising a coating comprising a polymer matrix is swollen with a pharmaceutical solution whereby a pharmaceutical active compound is imbibed into the polymer matrix. Rowan et al further discloses the pharmaceutical actives include rapamycin (column 16 lines 49-51). Therefore it would have been obvious to one skilled in the art to incorporate the rapamycin taught by Rowan et al in Donovan's polymer matrix as such would inhibit the proliferation of vascular smooth muscle cells in vivo. In one embodiment, the Donovan et al

discloses the rehydrated first polymer covered stent is rehydrated in a calcium chloride solution and a sodium alginate solution comprising the virus and the solution is sprayed onto the fibrin stent. A layer of cesium alginate precipitates onto the surface with the virus. Alternatively the first polymer composition covering can be rehydrated in a solution of sodium alginate with virus and a layer of calcium alginate is sprayed or otherwise coated over the first composition covering now incorporating virus (column 13 lines 40-53).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
